2021/0022/P	anthony Richards	11/02/2021 12:14:10	COMMNT	To replace Portland stone cladding with this quite dreadful-looking glass-reinforced concrete is totally unacceptable and must be rejected. This monstrosity is bad enough as it stands but this will be totally hideous and destroy Swiss Cottage to an even higher extent. EL cannot be allowed to make themselves even more money by this cost-cutting abomination.
