

## Materials -External Timber Info

### Front Elevations- Cedar

A luxurious alternative cladding with soft warmth, this wood is highly stable and resistant to decay. Our Cedar is interlocking, leaving a nail-free finish to the cladding of your garden room. The colour will fade to silver without Oil treatment.

Examples of Cedar on Building

## Left/ Right & Rear Elevations

### EXTERIOR WALLS

18mm thick Maintenance free, FSC sustainable certified Scandinavian redwood is used as the standard cladding choice for our garden rooms with alternative options available as upgrades.
