2020/5566/P	Sarah TUCKMAN	19/02/2021 16:04:44	OBJ	<p>Although the application states that it is for minor alterations to the planning permission that has already been granted and there will be no additional windows in the east elevation, the east elevation looks out towards my back garden, and will rise above the roof of the western side of Spectrum House and will be upwards of the current flat roof on the north of the western side of Spectrum House. Compared to the permission granted, the proposed east elevation fills in gaps between the triangular shapes at roof level, making the height of the whole development level with the peaks of those triangles, and consequently will block out much more light to my back garden.</p> <p>It is also difficult to tell the other effects of the proposed alterations on the view from my house from the drawings submitted along with this application.</p>
2020/5566/P	Nancy	21/02/2021 15:01:53	OBJ	<p>In addition to my previous comments sent yesterday:</p> <p>This already very congested area has spikes of increased congestion, on most weekends and more significantly in the summer, as a result of the proximity to Hampstead Heath. The traffic, both people and vehicles, has been particularly intense during Lockdown with people are travelling to outdoor spaces to exercise or meet up with others. The Corporation of London could provide you with the stats, but they themselves have expressed concern regarding the damage to the ecosystem of the heath that will take a long time to recover from. Over many years I have watched with horror on summer weekends (single yellow lines on Gordon House Road so vehicles parked on both sides of the road) to see emergency vehicles struggle to get through the grid lock. This already existing problem should not be exacerbated by new residential development.</p>
2020/5566/P	Jane Kirwan	17/02/2021 10:01:02	OBJ	<p>We are horrified to hear of another attempt to get permission for flats in a highly densely developed area. There are four adults and two children living in this house and each of us would be markedly affected. There would be considerably less light at the rear of the house and the increase in occupation in the one part of this area that is used for offices and a well-used garage will unbalance the area. There are several houses that would be blighted by this application going through. We will be overlooked as our small yards are only a few metres from the proposed development.</p> <p>PLEASE THROW OUT THIS APPLICATION</p> <p>Thank you</p>

2020/5566/P	Nancy	20/02/2021 11:07:48	OBJ	<p>I petition for the rejection of this planning application on numerous grounds. Gordon House Road is already an extremely busy road, both in terms of road traffic and foot traffic, with a number of schools that children walk to. There already exists unacceptably high risks to the safety of pedestrians, the ability of emergency vehicles to get through (have never understood why there are no double yellow lines), delays to bus traffic on which many depend, and high levels of pollution detrimental to health. There is also the ever increasing frequency of vehicles for delivery, and they often park up partially on the pavement. All of this would be further exacerbated with any more residential development, and the units proposed would most likely result at least 19 new residents and possibly more than 10 vehicles - cars, or worse yet, SUVs.</p> <p>Incidentally, given that my objection is to further residential development, I would also be very surprised if the planning committee/departement would even consider an application where the proposed affordable housing has been dropped and the units proposed are not as 'family friendly' as is needed in the borough. There is a severe shortage of family size social housing (3 bed +) and I hope that Camden will give this a higher priority and possibly include both affordable housing and proper family units in criteria for planning applications for housing in the borough.</p>
