2020/5691/P	Ben Cohen	21/02/2021 20:16:32	OBJNOT	<p>1/ Design of the rear extension roof: We have made multiple requests for the height measurement of the rear extension at its highest point so we can assess whether this will block light to our property but the architect has not provided us with this, so we would ask that this be taken into consideration when assessing the planning application.</p> <p>2/ As a direct neighbour, we are very concerned about the building noise and dust pollution created by these extensive works at a time when our children are home schooling from 8.30am to 3.45pm and we are working from home all day. We are also concerned that the building noise and dust will make it difficult to use our garden - during lockdown and the tier system it has been an important place for us to exercise and relax and our children to play.</p> <p>3/ We are concerned about noise and cooking smells from the rear extension roof window coming into the upper storeys of our house when the roof window is open. Again, please can this be taken into consideration.</p> <p>4/ More broadly, we have sent questions regarding the foundations and guttering (among other things) to the architects, who have told us they are matters for the Party Wall Surveyor, so we have a lot of unanswered questions about the build.</p>
