Dear Mr Dempsey,

**Re-planning application 25 Gresse Street, London. W1T 1QW 2020/4252/P**

Today I viewed my objection for the above planning, which was sent through on the 9.1.20; I had somebody kindly send it through for me as I am not a computer person.

It seems that the signed residents sheet did not come through to the site with my other document. Would you kindly and if possible add the signed sheet to the paperwork sent through?

Further observations:

As I am sent notifications through the post for comments on applications of businesses apply for seating outside café, why cannot we be contacted when someone is applying for planning on a much more serious level and to do with the building we live?

I feel even if there is a small possibility that 5G/6G could effect human health ACCUMULATIVELY, out of responsibility RESIDENTS should be contacted individually and need more information based on credible research before putting 5G antennas directly above their homes. There are plenty of office spaces that can be used that do not have people living directly underneath.

Please could the above be considered?

Thank you for your attention.

Yours sincerely,

A Cooke
