

PLAN VIEW ON ROLLER SHUTTER

CHECK YOUR SHUTTER SPECIFICATION 1ST

1No 240v13amp switched fused spur is required for Non Fire Rated Single Phase motors.

Single Phase Fire Shutters require a N/O clean set of contacts to activate the fire panel plus 2No 240v 13amp spurs, 1 for the motor & 1 for the fire panel. The fused spurs is to be provided within 1M of the shutters at motor height.

For each 3 Phase Shutter we require 1No 16amp Spin 415v wall socket to be located at high level no more than 1m from the shutter motor. Three Phase shutters = 415v 16amp.

The fused spurs is to be provided within 1M of the shutters at motor height.

This is to be completed prior to Armourpost's attendance.

<VERY IMPORTANT>

All internal/external panels in way of shutters **MUST** be easily removable to permit access to full length of shutter barrel for adjustment, maintenance and repair.

All manual over-ride positions **MUST** be agreed by Architect **BEFORE** shutter installation.
