# MARCH 2021 TWEAKS TO THE CLOUD HOUSE AT 20 VICARS ROAD NW5 4NL

Following feedback on The Cloud House from Jaspreet Chana and Colette Hatton in an email sent on the 26<sup>th</sup> of February 2021 (in response to drawings submitted in early February 2021, following those submitted in January 2021 reflecting minor changes discussed on 17<sup>th</sup> December 2020), the two stainless steel plunge pools on the top roof terraces have now been replaced by two high-quality handmade wooden baths.

## REASONS FOR THE CHANGE:

In Jaspreet's email of 26<sup>th</sup> February, concerns were raised about the safety of the proposed stainless steel plunge pool for No 20, at the front of the building. Following consultation with an expert, we have decided to swap the plunge pool for a smaller – but equally high-end and beautiful – handmade wooden bath here instead. There will be approximately 60cm of space all around No 20's rooftop bath, so this area at the front is now just as safe as the rest of the terrace, enclosed by a 1.2m-high boundary wall.

It will be a deep bath, with 75cm-high sides, inspired by the Japanese 'Ofuru' soaking tub. Made from teak wood, it will gradually silver over time, but it is suitable for outdoor use and designed to have a lifespan of at least 100 years. The company making them uses ethically produced timber from sustainable sources.

The safety of the stainless steel plunge pool on the lower back terrace, for No 20A, would not have been an issue – but in order to keep a uniform look across both terraces, we have decided to swap the plunge pool on the back terrace for a wooden bath as well.

PETER MORRIS & EMILY KENNEDY, MARCH 2021

The wooden baths on the roof terraces of THE CLOUD HOUSE will be similar to the ones pictured here.
