Noise from demolition and construction works is subject to control under the Control of Pollution Act 1974. You must carry out any building works that can be heard at the boundary of the site only between 08.00 and 18.00 hours Monday to Friday and 08.00 to 13.00 on Saturday and not at all on Sundays and Public Holidays. You must secure the approval of the Council's Noise and Licensing Enforcement Team prior to undertaking such activities outside these hours.

- 6 This application seeks consent for the installation of internal secondary glazing to one window at ground floor and one door at basement level for temporary noise mitigation during construction of the HS2 railway.

The application site is a grade II listed mid-terrace townhouse located in Camden Town Conservation Area. The property dates from the mid-19th century and is one of a terrace of twelve houses. The property comprises four floors raised on a basement. The first floor windows have console bracketed cornices and a continuous cast-iron balcony.

Secondary glazing is proposed to be added to the rear of the building at Basement and Ground floor levels. On these floors the secondary glazing will be set back by 100mm to provide sufficient gap to the primary window to ensure the best noise insulation properties. The glazing will be fitted to a new timber frame mounted to the sash box and around the door frame.

The proposed design is intended to meet the functional requirements of

reducing noise within the residential property and meeting the environmental requirements specific to the circumstances of this application, whilst minimising the impact on the significance of the heritage asset and minimising inconvenience to the residents.

The sash windows and secondary glazing will be openable so there will be sufficient ventilation to minimise the risk of heat distortion or damp decay to the historic fabric.

From assessment, there is limited historical value to the door and window within this application. The door is an aluminium replacement to the original and the window at ground floor level is considered to be a timber replacement.

The proposed internal secondary glazing works will have minimal visual impact and will be of a reversible nature, causing no harm to the special interest of the grade II listed building.

Public consultation was undertaken for this application. Camden Town CAAC were also notified of the application and responded with no objection to the proposal.

The site's planning history was taken into account when arriving at this decision.

Special regard has been attached to the desirability of preserving the listed building and its features of special architectural or historic interest, under s.16 of the Planning (Listed Buildings and Conservation Areas) Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

As such, the proposal is in general accordance with policies D1 and D2 of the Camden Local Plan 2017. The proposed development also accords with the London Plan 2021 and the National Planning Policy Framework 2019.

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraph 38 of the National Planning Policy Framework 2019.
