2021/0976/T	Eve K Hersov	23/03/2021 17:18:32	OBJ	The 3 Helm Oaks are mature specimen trees that are attractive from the street and form an important noise and visual barrier to neighbouring properties, as well as taking up excess water underground which is a factor in an area that is low-lying, overly developed, and where there are underground streams Removal of these specimen trees would be a significant loss and seems completely unnecessary.
