2021/1436/T	Alan Gregg and Angela Clist	11/04/2021 15:59:06	COMMNT	<p>We support Option 1 which would leave the trees intact and healthy. We do not support felling the trees. The London Tree Company (which has put in this application) worked on a tree in our garden on Gayton Road just a few weeks ago. They did a good job of reducing the spread of our large tree. This will also help to reduce the size of the roots.</p> <p>The green canopy provided by the trees in our gardens (including the two trees in this application) is a joy to behold in the summer. Mature trees are being felled at an alarming rate in Hampstead and we think Camden Council should be doing everything it can to preserve these trees. Hampstead is going to feel like a very different place if trees continue to be felled at the current rate. The benefits the trees provide in terms of privacy, removing pollutants from the air, wildlife habitat, and general well-being are incalculable. We believe that the human and the tree can co-exist! So we support Option 1.</p>
2021/1436/T	Robin Woolfson	11/04/2021 16:41:34	SUPPRT	<p>I respond on behalf of Gayton Residents' Association (GRA) Committee to support Option 1.</p> <p>The rear garden trees in properties on the north side of Gayton Road provide welcome greenery, a habitat for birds and screening/break from the rear of houses of Gardnor Road and the Spencer Walk development. Loss of these trees will significantly reduce these amenities and compromise the privacy of residents.</p> <p>GRA strongly supports tree preservation whilst acknowledging that trees should be properly maintained. Comments from the Hampstead Forum in their response to a recent application (2021/1004/T) provide helpful examples as to how boundary walls can be maintained to accomodate tree growth.</p>
