2021/1581/T	Doona Labi	12/04/2021 10:55:20	COMMNT	<p>I live in the Garden Flat 79 Belsize Park Gardens and this well-established, and well-loved, sycamore tree is in my garden & indeed it was already here when I moved here in September 1958, i.e. almost 63 years ago. I was very shocked to be informed of its present condition after its pollarding on 17.3.2021 (TPO Application, 2020/5657/T).</p> <p>Due to the submitted reason for this TPO tree removal application, that the sycamore tree is diseased, I request that the Council will only make its decision after receipt and consideration of the required Arboricultural Report, as per Application Point 4, 1.</p> <p>I note that at present, i.e. Monday 12.4.2021, it appears this Report has not yet been received by the Council.</p> <p>Further, for information there is a birds' nest in the sycamore tree, so presumably that has to be taken into consideration with appropriate action according to current legislation.</p> <p>The present submitted details only show a rough drawing of the tree's location. Obviously it is not to be confused with the garden's other TPO, the pear tree.</p>
