Dear Sir/Madam

Please consider to do all possible to save the tree in question. There is a reasonable and plausible concern that the trees are not the problem. The foundation of this part of the building are poor, original purpose was to support a garage added onto the building. Mr Barker has repurposed as dwellings.

We share a party wall with Mr Barker, and our property has changed dramatically since his works. I've long suspected, and have voiced, that his digging out of the foundation has moved the building.

The trees have been in that spot for an age, I'm not trying to be dramatic or state the obvious, but, once they're gone, they're gone.

Sincerely

Mr & Mrs Brown
