

## **Clean Water Modelling complete - capacity confirmed – DS6059260 / 1019562773**

**NM819a**

**Your site address:** Chalk Farm Development, Chalk Farm Road, London NW1 8AA

### **Our clean water network has capacity**

London, 09/04/2021

Dear Mr Martin,

Good news - we've now completed modelling on our clean water network and can confirm capacity for all 669 properties (increase of 71 of original request) on your development.

#### **What do I need to do?**

Please take note of the validity period for this report, which is until 8/4/2022. Do get in touch if your plan changes, such as an increase in the number or density of properties, as we'll need to check that our network still has the necessary capacity.

#### **What happens next?**

When you're ready to move ahead with a water supply for your new development you can:

1. Engage an independent installer or supplier, known as a [self-lay provider](#) or [NAV](#)
2. Apply to us on <https://www.thameswater.co.uk/developers/larger-scale-developments/clean-water/new-mains-or-connections>

#### **Can I speak to someone?**

As your dedicated contact for your clean water pre-planning enquiry, I'm here if you need a hand.

Just call me on the number below.

Yours sincerely,

Mariusz Cieslak  
Asset Development Manager, Thames Water
