Subject: Re: OBJECTION 2021/1148/L

Dear Tony,

Thank you for letting me know about this and ensuring the projecting signs will now be externally illuminated.

That would be fine with us. However the drawings currently online still show the internally illuminated versions that were initially proposed, only a new document has been uploaded showing the existing externally illuminated sign.

It's probably just a technical error. We don't have any need of objection if the projecting signs are to be externally illuminated as you say.

Owen
