I write in support of the removal of this tree. As the next door neighbour I am concerned that the fungus will spread to other nearby trees on the wind. The presence of these mushrooms is an indication of rot. Furthermore the tree undermines the wall along the pavement and it's roots also undermine the party wall between our properties which I have recently repainted. Notwithstanding the tree is a landmark on the street it would be wise to fell it as soon as possible for fear of further damage to the environment Jeremy Lewison
