

Meadow Area Preparation

- cut law to max 10mm high, lower if mower allows
- remove all clippings / straws from site
- thoroughly rake the area removing as much of the thatch as possible to create open areas of soil
- repeat weekly for minimum of 8 weeks throughout July and August prior to sowing meadow seed in September
- do not fertilise
- do not incorporate or cover the seed
- firm seed in with a roll or by treading. To give good soil/seed contact
