2021/1873/T	Dave Eastman	11/05/2021 18:52:25	OBJ	<p>Please do not cut the trees and instead limb them.</p> <p>The trees proposed for cutting benefit the entire neighbourhood, not just one residence. They are landmarks that set the tone of the block. They have aesthetic value that contributes to the economic value of our real estate and our enjoyment of our backyards. The contrast in the appearance of the two trees together creates a beautiful silhouette that is interesting to watch, especially in the winter, and the wind through their branches during the rest of the seasons is soothing to hear. They provide an economic service by giving wildlife shelter and a green belt to traverse between properties and other trees. Green trees improve air quality that is a problem we all face in Camden borough and should be a priority for the borough to protect. The decision to cut the trees affects everyone around the property and I would welcome the opportunity to explore how the trees may be kept while meeting the needs of the property owner.</p>
