Smart Hub Proposals

Examples of Works to Highways

These images relate to an existing installation and illustrate the attention to detail in pavement reinstatement. The existing slabs are removed and cut to accommodate the unit plate fixings. Slabs are reused and reload to present a seamless transition and high quality in build standards

Forum Unit Proposals

Examples of Works to Highways

The images below show recent installations into the centre of Bradford and Hull with the use of local York stone paving and block paviours in the pavement reinstatement. The narrow strip foundation is confined to a minimalist stainless steel plate around which the surrounding surfaces are cut to fit and form level surface. Where, as in the case of the MCC estate, column units with a larger footprint are removed, the reinstatement will be in the same materials and the highest standards
