2021/1806/T	Adrienne Montes	14/05/2021 13:49:28	OBJ	<p>Variety of trees attracting different wildlife and different habitats.</p> <p>Its not in anyones way</p> <p>Adds to air quality and shade for outside space whilst working/ playing</p> <p>Old trees add to the habitat or the area.</p> <p>Shared by all the neighbours</p>
2021/1806/T	Sarah O'Donnell	17/05/2021 02:32:23	OBJ	<p>Regarding the application to fell the Eucalyptus: This is a beautiful and magnificent tree which appears in a very good state (recent photos available). It contributes positively to the essential (though sadly rapidly diminishing) biodiversity of this conservation area, not to mention the joy it gives to others nearby who have seen it grown and appreciated it's uniqueness over many decades. It appears to be located in an area of the rear garden safely enough away from a residence, to be of any threat. It would seem a great shame to fell this beautiful mature specimen. Please reconsider, thank you</p> <p>14/05/21</p>

2021/1806/T	Anna Parkinson	14/05/2021 14:08:28	COMMNT	<p>I am opposed to the felling of this tree firstly as it is such an object of beauty, but furthermore, as quite unique in it's surrounding area, it provides homes to many birds and attracts a variety of insects, it provides shade for people working and playing in the garage area it overlooks throughout the summer months, interrupts westerly winds and in an age where we are destroying the planet as a whole, it seems contradictory to current discourse around doing all we can to prevent this decline. Furthermore, with diminishing quality of air in the city, the felling would only contribute this this worsening. As very far from the property's residence, ie: bottom of their garden, it cannot be needed for structural purposes. Therefore I believe this tree should be left for many more generations to enjoy.</p>
