Subject: 26 West Street (2009/5805/P)

Dear Sir / Madam,

I am a resident of Tower Street, WC2 and have received a consultation notice in respect of the above planning application. As far as the external elements of this scheme are concerned, this is merely a repeat of the application submitted last August to which I objected at the time and which was rejected. The objections I made at the time remain relevant.

The rear aspect of my home is at the bottom of the "gully" between Tower and West Streets. As such, my view and natural light is already severely restricted by the properties on West Street. The proposed enlargement of the roof structure at 26 West Street will significantly exacerbate this problem, for which reason I strongly object to this scheme.

I should be grateful if you would acknowledge receipt of this comment and if you would also keep me informed of the outcome of the consultation.

Yours faithfully,

[REDACTED]
