2021/0162/P	Deborah Taffler	01/06/2021 09:44:10	OBJ	<p>Further to previous objections to an application for adding a storey to this property, this new application appears to be for an identical project and I therefore raise a number of strong objections. I am a resident at 3 Tobin Close. We are south-facing, and the rear of our house faces the front of Number 9. Having already lost morning light to the additional storeys added to Kings College Court, a fourth storey at Number 9 will significantly further affect light to the back of our house, especially during the autumn/winter months. 'Significantly' because, as with all properties art 1 - 8 Tobin Close the only main light source to the ground floor of our property comes through large patio doors and the kitchen window to the rear (the front of the houses have small windows and, being north-facing admit very low light levels). The building proposals will also mean that our house will be further closely and directly overlooked. Perhaps most importantly, it will make 1 - 8 Tobin Close feel completely 'penned in' with Kings College Court to the east, Dorney to the West, and 3 storey properties on Fellows Road to the north, and these plans for taller properties to the south. Given that an application to raise our roofs by only a few feet to allow us access to our loft spaces was refused, we cannot fathom how an additional storey to any of the properties at 9 - 14 can possibly be agreed.</p>
2021/0162/P	Jane Dyas	01/06/2021 20:19:44	COMMNT	<p>I would like to make an official objection to this planning application, I live in Tobin Close, it will obstruct our light & privacy, be a complete blot on the land scape as not all houses in the terrace are not applying for an additional storey. This is a conservation area so all applications should be considered & this is appalling!</p>
