2021/2575/T	Vijay Radhakishun	29/05/2021 17:05:02	COMMNT	I object to the request above. The tree is clearly visible from the street (Lancaster Grove) and therefore an integral part of the aesthetic of the broader neighbourhood. Furthermore, the supporting rationale is too limited and reflects an entirely subjective assessment and thus insufficient for approval. More generally, at a time when the UK and other signatories to the Paris Agreement, are striving to reach net zero greenhouse gas emissions by 2050, cutting trees down without a compelling rationale is not the way forward.
2021/2575/T	Ms K J Conn	29/05/2021 11:16:10	COMMNT	<p>It is extremely concerning that the reason of 'dominating' the garden is given for felling a beautiful mature tree. In the time of climate and ecological crisis that is already impacting life and health the default must be that trees should only be felled if they are dead, diseased or dangerous. There is masses of evidence of the role that trees play in the health and well-being of people and planet. We have a moral duty not to ignore this if we want our children to have the possibility of a liveable future. One less tree is one too many!</p> <p>'What if I told you there was a single intervention we could deliver in our cities that would cool them during heatwaves, reduce flooding, scrub pollutants from the air, boost biodiversity, improve public health, and even reduce crime? You wouldn't believe me. But it's true.' John Burke FRSA For references: See https://twitter.com/jonburkeUK/status/1398286150243176452?s=08</p>
2021/2575/T	Nigel Pearce	01/06/2021 11:52:13	OBJ	it should not even be a consideration that this beautiful healthy medium size tree, clearly visible from the street should be removed!
