## Management of Health and Safety at Work Regulations 1999

### Legal Requirements

Regulation 3 of the Management of Health and Safety at Work Regulations 1999 requires employers to make suitable and sufficient assessment of the risks to the health and safety of their workers or any other person who may be affected by their undertakings and to record the significant findings of the assessments. This requirement also relates to the self-employed.

### Recording

The recorded assessment should be an effective Statement of hazards and risks, which then leads management to take the relevant action to ensure health and safety. It needs to be part of the employer's overall approach to health and safety.

### Contents

- All relevant hazards and risks should be addressed
- Consider what normally happens in the workplace or during work activity
- Consider who might be affected
- Take into account existing precautionary measures
- Show what control measures are to be put in place to ensure a safe system of work

### Format

The enclosed form has been designed to assist in meeting the above requirements. A number of construction operations have been identified, together with associated risks and hazards and recommended control measures in generic form. The format has been designed so that when completed, it will be regarded as 'Site Specific'.

The assessor is invited to select from those generic hazards suggested, to indicate whether they are applicable and to add others, identifying the persons at risk and the risk product.

### Quantative Evaluation

This is obtained by expressing in number form the **likelihood** of injury occurring during the proposed work and then the possible **severity** of such injury. Mark the 'Without controls' risk matrix with horizontal and vertical lines for the severity and the likelihood, where the two lines cross is the overall risk product. The risk product is obtained by multiplying the two numbers together, in consequence the higher the number the more serious the matter.

<p><b>Without controls</b></p> <table style="margin: auto;"> <tr> <td style="text-align: right;">Severity</td> <td style="text-align: center;">3</td> <td style="background-color: yellow; width: 30px; height: 20px;"></td> <td style="background-color: red; width: 30px; height: 20px;"></td> <td style="background-color: red; width: 30px; height: 20px;"></td> </tr> <tr> <td></td> <td style="text-align: center;">2</td> <td style="background-color: green; width: 30px; height: 20px;"></td> <td style="background-color: yellow; width: 30px; height: 20px;"></td> <td style="background-color: red; width: 30px; height: 20px;"></td> </tr> <tr> <td></td> <td style="text-align: center;">1</td> <td style="background-color: green; width: 30px; height: 20px;"></td> <td style="background-color: green; width: 30px; height: 20px;"></td> <td style="background-color: yellow; width: 30px; height: 20px;"></td> </tr> <tr> <td></td> <td></td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> <td style="text-align: center;">3</td> </tr> <tr> <td></td> <td></td> <td colspan="3" style="text-align: center;">Likelihood</td> </tr> </table>	Severity	3					2					1						1	2	3			Likelihood			<p><b>With controls</b></p> <table style="margin: auto;"> <tr> <td style="text-align: right;">Severity</td> <td style="text-align: center;">3</td> <td style="background-color: yellow; width: 30px; height: 20px;"></td> <td style="background-color: red; width: 30px; height: 20px;"></td> <td style="background-color: red; width: 30px; height: 20px;"></td> </tr> <tr> <td></td> <td style="text-align: center;">2</td> <td style="background-color: green; width: 30px; height: 20px;"></td> <td style="background-color: yellow; width: 30px; height: 20px;"></td> <td style="background-color: red; width: 30px; height: 20px;"></td> </tr> <tr> <td></td> <td style="text-align: center;">1</td> <td style="background-color: green; width: 30px; height: 20px;"></td> <td style="background-color: green; width: 30px; height: 20px;"></td> <td style="background-color: yellow; width: 30px; height: 20px;"></td> </tr> <tr> <td></td> <td></td> <td style="text-align: center;">1</td> <td style="text-align: center;">2</td> <td style="text-align: center;">3</td> </tr> <tr> <td></td> <td></td> <td colspan="3" style="text-align: center;">Likelihood</td> </tr> </table>	Severity	3					2					1						1	2	3			Likelihood

-----------------	---------------	---------------------	---

**Note:**

- HAZARD... is defined as “the potential to cause harm”
- RISK... is defined as “the likelihood that the harm will occur”

**Controls**

The Assessor is invited to select from the list of suggested controls those that he feels should be implemented. Space is also provided for the inclusion of other controls considered necessary to deal with any circumstances relating to a particular site. Re-evaluate the risk product using the ‘With controls’ risk matrix. The controls are a minimum standard, understanding of the task, the circumstances may well lead to additional controls becoming good practice for all operatives involved.

**Further Information**

Further information can be obtained by reference to CITB Construction Site Safety Manual (GE700). This publication, which is updated annually, provides easy to understand information on the way that construction activities should be undertaken. Some Risk Assessments have additional information suggested at the end of the assessment.

**Lone Working**

Under no circumstances will ‘Lone Working’ be permitted on any site unless specific permission has been granted by The Director Responsible for Safety.

**Method Statements**

These Risk Assessments are to be read in conjunction with a site specific Method Statement which will go into greater detail as to how the task is to be carried out.

-----------------	---------------	---------------------	---

**COVID 19 is a virus which can cause serious illness and death for which at the moment there is no vaccination or cure. We need to follow government guidelines to ensure the safety of the workforce and the public.**

**Symptoms can include high temperature, loss of smell and taste, and a persistent cough.**

<b>Persons at risk:</b>	<input checked="" type="checkbox"/> Site personnel <input type="checkbox"/> General public <input type="checkbox"/> Client personnel <input type="checkbox"/> Other		
<b>Controls Considered Necessary:</b>			
<input checked="" type="checkbox"/> Office Staff to work from home if possible, if not possible perhaps part office/part home. <input checked="" type="checkbox"/> If staff cannot work from home stagger working patterns in the office. <input checked="" type="checkbox"/> Maintain personal hygiene. Washing hands regularly using hand sanitisers. <input checked="" type="checkbox"/> Stagger work breaks, arrival and leave times. <input checked="" type="checkbox"/> All Staff are to follow the site specific Coronavirus site rules. <input checked="" type="checkbox"/> All Staff should only be on site if fit and well, anyone showing symptoms of COVID-19 should go home immediately without coming into contact with any others on site other than telling someone and line manager they are going. <input checked="" type="checkbox"/> Do not come to work if someone in your household or bubble tests positive or shows signs of symptoms. <input checked="" type="checkbox"/> Government have issued guidelines for self isolation and these should be followed if showing the symptoms or anyone else in the same household has the symptoms <input checked="" type="checkbox"/> All Travel should be kept to a minimum, NSF staff should endeavour to travel to site in separate vehicles unless living in the same household, No one should travel at breaktimes outside the site to shop locally for food. <input checked="" type="checkbox"/> Try to avoid public transport if possible. <input checked="" type="checkbox"/> Vehicles should be kept clean at all times and rubbish emptied daily. <input checked="" type="checkbox"/> On arrival to site for the first time make yourself known to site management but try to avoid walking into site offices. Site inductions where possible should be carried out outside or if inside with limited numbers in a well ventilated room. <input checked="" type="checkbox"/> Try to avoid using fingerprint sensors and turnstiles. If these have to be used then ensure hands are well cleaned after, keep your own pens for signing in and avoid using shared pens. <input checked="" type="checkbox"/> Site meetings to be kept to a minimum and ideally always outside while following the social distancing rules of 2m. in the event of bad weather try to rearrange the meeting or use a well ventilated room and keep numbers to minimum. <input checked="" type="checkbox"/> Site will have their own procedures for welfare facilities. Where possible try to avoid. Always follow the site policy and if and when using facilities on site ensure we stagger the times we use them and keep all areas clean and tidy. <input checked="" type="checkbox"/> Ideally take breaks outside or if the weather is bad use you own van to sit in. <input checked="" type="checkbox"/> Do not sit around in groups during breaks, always follow the 2m social distancing rule <input checked="" type="checkbox"/> At all times try to avoid close contact work, if heavy items need lifting then use mechanical aids if possible. Use the attendant excavator to lift concrete hoses when connecting to avoid 2 people standing close together. <input checked="" type="checkbox"/> In the event of a problem / breakdown and 2 people need to work close together then a face mask should be used. close contact work should be carried out if no other options are available <input checked="" type="checkbox"/> PPE should always be kept in good order and everyone should only use their own PPE. Any disposable should be disposed of as soon as it is finished with.
