REVIVAL

ECOLOGICAL FEATURES AND COMPONENTS FOR GREEN ROOFS

DETAILING

A range of habitat additions and essential components to add form and function

WWW.GREENROOFREVIVAL.COM | TEL: 0203 828 7022

OUR CURRENT CLIENTS INCLUDE

Exciting habitat panel designs for the bees and butterflies your roof will attract, available as floating (above) or wall-mounted (front page) and in colours of your choice incl to to match your corporate/brand identity

Arrangements of natural materials to add visual interest and ecological function to the green roof vegetation

Aluminium angle profiles for retaining material in the absence of parapet, and for separating vegetation from pebbles

Where necessary your waterproofing can be finished with a graphite plastic trim to provide a drip edge or simple finish

For a price enquiry or to order, please email help@greenroofrevival.com

WWW.GREENROOFREVIVAL.COM | TEL: 0203 828 7022

OUR CURRENT CLIENTS INCLUDE

We integrate aluminium edging with our SHEARSTOP™ anti-slip system to maintain a delicate eaves profile

Galvanised gabion with pebble infill provides a beautiful counterpoint to the planting and habitat features

Gabion can also be installed with reclaimed slate. This smoking shelter also features a rainchain to carry water to the ground

Basic leaky pipe and sprinkler systems for the watering-in period (NB more sophisticated professional systems available through partners for durable, ongoing irrigation)

For a price enquiry or to order, please email help@greenroofrevival.com
