

## Wildflower Turf Ltd

### Soil-less Substrate

#### General Specification

#### Soil-Less Substrate

- This product is an inert, composted green waste based medium
- It contains a pH modifier, a wetting agent, low levels of organic nutrients and mycorrhizae

#### Product specification

- It can be provided in 20 kg degradable or non-degradable sacks or loose in 1m<sup>3</sup> or 2m<sup>3</sup> bulk bags (equating to 40m<sup>2</sup> or 80m<sup>2</sup> laying amounts) or in bulker trucks depending on volume required
- Typical weight: 400kg per 1m<sup>3</sup> bag
- Typical bulk density: 350g/l
- Typical moisture content is <40% volume

#### Sustainability

- To produce this environmentally beneficial product, every effort is made to source sustainable ingredients, for example, composted green waste and organic nutrients, as well as carefully monitoring all inputs such as electricity and water.
