I am writing to object to the plans to build another floor on 13 Tobin Close

Here are my reasons

∫ Most of the sunlight we get in our house is from the rear of our property so another floor on those houses will greatly reduce our sunlight and view of sky, making us feel much more closed in. We already lost daylight when the extra floors were erected on Kings College Court despite all our objections.

∫ Our houses are only two storeys and 9-14 are three storeys. The difference is already felt by having three storey houses on Fellows Road to the front, Tower block at the end of the close, the additional height to Kings College Court and the proposed additional storey to 9-14 Tobin Close.

As the landscape changes around us and becomes more concrete and light and sky are blocked off the our sense of well-being is diminished and the sense of community in our close is changing as the inequality of these decisions are made without addressing how it impacts on the rest of us who have to be more and more compromised.

∫ This will completely change the look of the estate and the changes are not consistent with the original design of the estate.

∫ We are already overlooked by these properties mentioned now we are going to feel even more overlooked and our privacy is further compromised by the addition of another floor looking directly onto our patio gardens

∫ I hope you will take these things into your serious consideration and try to understand what it is like from a personal point of view being subjected to such drastic changes in our living situation.

Yours sincerely

Caroline Chan
and also on behalf of my son
Oliver Chan
who cannot write his objections due to his disability
