Hi Nick.

I am emailing you to put in a plea to not cut down the Ash next to no:1 Rossendale Way (T1) This gesture is a symbolic one. The Ash is and always was the runt of the litter and when threaten several years ago with being cut down along with 15 other trees. A number of us came together and decided we would do what we could to save it. We had been told it was diseased, It wasn't and the Arborist who did the survey suggested it and as many of the other trees under threat should have TPO applications. As he made the application, (I'm sure his details are on file.) We managed to save 9 of the 16 threatened trees.

The situation hasn't changed T1 is still the runt of the litter but who says everything has to be perfect and it is what kicked off the protection of the other trees. I would be so sad to see it cut down.

Please help if you can.

Stella Timmins.
