Subject: Elm Village trees ref 2021/2926/T

I wish to support this planning application for the felling of five trees in Elm Village.

I have been particularly alarmed over the past year about the danger these trees pose since the collapse of a large elm with a 25+ metre spread on a very windy day.. Fortunately, nobody was injured but cars and property were damaged and the remains of the tree had to be cut down by a tree specialist. Also, I recently went out one morning to find a large cherry tree at the end of Rossendale Way had collapsed and completely blocked the road.

The Silver Birch at the rear of 19 Bergholt Mews is also very worrying as it is growing in a raised bed with insufficient room for its roots. Again, in periods of high wind it causes real alarm to those living in its vicinity.. It really is only a matter of time before it comes down and causes untold damage to life, limb and property.

Please allow the planning application above asap.

Kind regards,

Rosaleen Haddow

101 Rossendale Way, NW1 0XA
