Subject: RE: 150 Holborn - Soil report

Hi Ricky,

PH levels are often high due to presence of concrete in the material when sampling.

With the photos we saw and visual inspection of loads upon receipt in the yard, we confirmed this was likely and therefore were happy to receive at our permitted facility as the material was being recycled.

If you need any further info, please let us know

Cheers

Kind regards

Daniel

Daniel

Can you please confirm the below as mentioned in the attached email.

We confirm that the high Ph levels in the soil is not considered hazardous

Thank in advance

Hi Ricky,

Confirming we are able to remove the material indicated by these results under the same classification.

Cheers

Kind regards

Daniel
