

To Nathaniel Young and all concerned.

I object to the above application. The proposed light well is in direct contradiction of the Conservation Area guidelines, as my neighbour Stuart Mills has so clearly explained in his more detailed letter of objection that I fully endorse.

Camden established these guidelines for good reason, to preserve the architectural integrity of the area. It is surely the Council's responsibility to ensure that the guidelines, in this instance affecting the fully visible and arguably all the more sensitive street frontage, are correctly applied.

Inappropriate changes to facades at numbers 3 and 23, initiated prior to the establishment of the guidelines, should serve not as a precedent but as a stark warning of the dangers of allowing incremental breaches of these guidelines.

Yours,

Philippe Garner
