Dear sirs,

Reference 2021/2926/T (Associated works to Trees.)

I am writing to give my support for the maintenance , removal and pruning of trees in Elm Village.

I live in Rossendale Way and am mystified that the trees have been allowed to get so dangerously large not only causing a risk to property and surfaces with their roots but also now presenting a very real danger of falling branches in high winds which, have very real potential to cause significant property damage together with risk of injury.

Already I understand that two trees have recently come down one by the green where people and children gather and only by luck causing no injury and only damage to property. The other at the entrance to Rossendale Way.

Oddly I believe some of these trees have a preservation order although the reasons are unclear given the potential, recently transpiring into fact, for harm.

I would urgently give and record my request in support of the dire maintenance due to make safe these trees before there is consequential further harm and damage which will clearly happen should nothing be done.

Many thanks

Garry Taylor

57 Rossendale Way NW10XB
