**Subject:** Elm Village Planning Application Number 2021/2926/T

I am writing in full support of this application for works to trees in Elm Village that are covered by a TPO.

I have lived in Elm Village since 2007 and I appreciate the local environment very much. However, many of the forest trees planted forty years ago are now far too big and in some cases have become a hazard. In the wake of the large elm tree near me blowing down last August two large adjacent trees (a field maple and a silver birch) were pruned but much more work needs to be done.

I am one of the residents that work actively at keeping the estate looking good and well cared for and I care about the trees. But the work in this application badly needs doing. I hope the Camden planning department will agree to it.
