

Dear Sir

I object to planning application 2021/2071/P for the following reasons.

I live at Number 7 Elsworthy Road. My experience of an enlarged external staircase and platform at ground floor level recently installed at Number 9 is of an increase in resulting noise level which carries into our garden in a most intrusive way. Some limited open trellis screening with jasmine planting has not mitigated the impact.

I am very alarmed that the proposed external ground floor terrace in the application 2021/2071/P will likewise have the potential for a significant increase in noise which carries and which will inevitably be very detrimental to neighbours' enjoyment of their gardens. It is difficult to see how this can be adequately mitigated. There is also an issue of reduced privacy and I do not see adequate measures to ensure that existing privacy of neighbouring gardens is secured at all times of the year.

Yours sincerely

Adele Davies
