6. Description of the Proposal

Please describe details of the proposed development or works including any change of use.

If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.

The applicant requires the permission for the following minor works:  
- Increase the size of the patio rear door: It is currently a single door, in very poor condition. The door is currently 900mm, we are proposing to increase the opening to 1200mm and install a double door, to improve the access to the terrace and increase the natural daylight coming into the room.  
- Increase the size of the window above the bathroom on the staircase landing: At the moment it is a small window on a very large wall that doesn't let much light in, so the staircase is extremely dull and dark. The window is so high up it cant be opened, there is limited air flow and the window is starting to go mouldy. We would like to replace the window with a larger electrically operated window, allowing the window to open and let more natural light in, reducing the amount of artificial light used during the day. Style and design of the existing window to be kept.
