## 15. Materials

Does the proposed development require any materials to be used?

Yes  No

Please provide a description of existing and proposed materials and finishes to be used (including type, colour and name for each material) demolition excluded

Please add materials by using the dropdown list to select the type, clicking 'Add' and entering all the details in the popup box

Type	Existing materials and finishes	Proposed materials and finishes
Roof covering	The roofs are in reinforced concrete, the falls across the flat areas being built up using a screed which seems to be a mixture that includes saturated Vermiculite.	A single-ply or liquid applied membrane which can be coloured to match the existing finish laid over a new layer of insulation on top of a new screed layer providing the falls on top of the concrete slab.
Other Roof Parapets	Folded building felt.	Proprietary formed aluminium trims with drip detail.
Other Roof access hatch	Existing timber hatch in poor condition.	New purpose built, lighter weight unit with a hold open lock; build up kerbs to provide a better waterproof base detail.
Other Square flat rooflights	Single glazed with gaps to structural opening. Unlikely original. Not fit for purpose.	Remove the two small rooflights and replace with modern sealed glass rooflight units; build up kerbs to provide a better waterproof base detail.
Other Roof lantern	Single glazed lantern. The eaves are so close to the existing roof finish, that the roof membrane is tucked under the glass and not mechanically fixed to the upstand.	Remove main rooflight over stairs; build up kerbs to provide a better waterproof base detail. Reinstate the main rooflight with a new AOV opening rooflight.
Other Fall protection	None existing	A new "Mansafe" type system to prevent falling is a legal requirement. A series of anchor points fixed to the concrete linked by stainless steel cables back to the access hatch. Being below the level of the parapet it will not be visible.
Other M&E duct & extract fan	The fan extracting air from all of the kitchens looks very old. The flashings do not overlap the more recent roofing repairs properly.	Replace extract fan with modern unit on anti-vibration mounts and using silencers. Also set back from the parapet meaning it will not be seen from the street unlike the current setup.

Are you submitting additional information on submitted plans, drawings or a design and access statement?

Details of the pre-application advice received

The issues presented are real and understood. That said the preference is for retention and up-grading of original components wherever possible over like-for-like replacement, however it is also understood that in some instances replacement or redesign may well be the only practical option. Compartmentalisation within the building is inadequate. Proposed interventions are supported but should be visually unobtrusive/ design appropriate and the minimum necessary to achieve the necessary fire regulation standards needed.

The installation of wireless fire detection and radio-linked smoke alarms is supported although the location of these units will need consideration.

#### 40. Pre-application Advice

The roof whilst being a fundamentally important part of the building is of standard construction and appears to utilise commonplace elements. It is therefore felt that the roof covering (which has failed), the rooflights, roof lantern and access hatch are functional elements which are part of the building but not identified as major contributors to its significance. The repair/up-grading of the roof is supported. It is also accepted that the roof lantern will require to be modified with the inclusion of an up-stand. There are also design issues with the roof and thus the increase in the fall of the parapet gutter is also supported as is the redesign of the roof access hatch which in its current form is quite frankly dangerous.

The current kitchen extraction system is considered a utilitarian part of the building and not a major contributor to its significance although an integrated system incorporation into the design of the building is novel. The replacement of the existing system has the advantage of reducing its visibility at roof level and the noise level within the building.

The issue of building security and access to properties occupied by the common man was a matter yet to be conceived of as a problem in the years after WWII. Thus security is confined to lockable doors. Whilst I am sympathetic to the perceived need for camera security a location needs to be identified which provides sufficient surveillance without obtrusive presence.

Application generally supported.

#### 41. Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:

- (a) a member of staff
- (b) an elected member
- (c) related to a member of staff
- (d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

Yes  No

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?

#### 42. Ownership Certificates and Agricultural Land Declaration
