

Survey Plan Extract from drawing 33507a_01_P_Rev-0 dated May2020

Notes

1. The aim of the works is to demolish the garage building whilst maintaining the boundary wall (shown in darker brick colour) construction and its stability.
2. The works should be carried out with reference to BS6187:2011 Code of practice for full and partial demolition and Institution of Civil Engineers Demolition Protocol 2008.
3. The contractor is to refer to all relevant Engineer, Architect, and Surveyor specifications for the works, including assessment of any services present.
4. The contractor is to develop and carry out a sequence of works which ensure the safe and controlled demolition of the building whilst ensuring none or minimal damage to any adjoining structures (boundary walls). Any temporary works required to ensure this is the responsibility of the contractor. Any damage to adjoining structures is to be made good by the contractor.
