ROOF PLAN

Original Drawing Size: A0

GRID NORTH

NOTES:-
The accuracy and content of this drawing are dependent on the original specification and EDI should be consulted before use at other scales.

Where underground services are shown, all reasonable care has been taken within the remit of the original specification and requirement. Before use of this information the user should satisfy himself as to its adequacy and carry out his own investigation into the detail before undertaking any works. Due to the nature of this work and limitations imposed by ground conditions and the detection equipment no, guarantee can be given that all services have been recorded. Trial holes should be dug at critical locations.

All reasonable care has been taken in the survey detail represented on this drawing but any discrepancies must be reported to EDI immediately.

Our aim is to produce the best possible results within the specification and cost constraints of our clients. Any comments are most welcome.

Levels shown at kerbs are channel level unless stated.

Control: All levels and co-ordinates are related to the datums described.
The horizontal control of this survey is based on Ordnance Survey grid as translated from GPS coordinates using the OSGM15 transformation supplied by the Ordnance Survey to maintain true ground distances, based on station ST3. The vertical control of this survey is based on OS datum as translated from GPS coordinates using the OSGM15 transformation supplied by the Ordnance Survey. It is likely differ from the nearest OS benchmarks in the area which should be disregarded, all levels should be taken from EDI survey stations.
