2021/3165/T	Charles Harris	16/07/2021 17:54:00	OBJ	<p>I urge the Council to make a Tree Preservation Order in this regard.</p> <p>The school originally possessed ten weeping willows, nine of which they have already felled. Such destruction makes no sense as the River Westbourne runs directly under the school.</p> <p>Following the felling, the basement of their main school building has regularly been flooded, the most recent incident taking place just last Monday July 12th.</p> <p>Weeping willows and poplars are particularly effective in soaking up under ground water and should be preserved, especially in these times of extreme weather conditions.</p>
2021/3165/T	Leanne Bassett	17/07/2021 12:48:28	COMMNT	<p>I oppose adamantly to the removal of this beautiful tree. This property has already felled 9 Weeping Willows. Outside the fact of needlessly destroying a perfectly healthy tree that adds tremendously to the beauty of Hampstead, the River Westbourne runs under the school. Trees like this Weeping Willow soak up the ground water.</p>
2021/3165/T	D Abraham	19/07/2021 12:56:16	OBJ	<p>We desperately need more such trees not less. The council is strict about maintaining a certain look in a Conservation area. Surely it's equally if not more important to ensure the underlying health of the area and eco system.</p>
