2021/3349/T	Helena Djurkovic	16/07/2021 18:37:02	OBJ	<p>At a time when we are seeing the devastating effects of climate change, the idea of cutting down two mature and healthy trees has to be challenged. The garden falls in a conservation area and the trees provide pleasure to residents of all the surrounding properties. It also provides a home for wildlife. As the vision for Camden (outlined in Camden 2025) states, the Council wants to improve the health of the people living in the borough. Trees play a vital role in reducing pollution and improving well-being. Since the planning application will serve to increase pollution and reduce well-being, without any compensating benefits such as the provision of more housing in the borough, there are no justifiable ground for felling them.</p>

2021/3349/T	Minesh	19/07/2021 16:19:26	OBJ	<p>We Object to trees being cut down.</p> <p>These trees were Pollarded by previous Owner in 2020 for which permission was granted on 12.2.20 REF: 202/0311/T . They have been healthy and well cared for.</p> <p>No neighbours have any issues with them. There are no signs of damaged wall but if it that can be easily rebuilt. All the buildings and garden have light and shade at one point in the day and see no reason to fell healthy plane trees which has taken years to grow.</p> <p>We Object !!!!</p>

2021/3349/T	Kristin Dahlstrom	19/07/2021 08:35:40	OBJ	<p>I object to the removal of these two beautiful trees. In a conservation area trees should be considered a communal asset and property leaseholders/owners should act as custodians of the trees within their boundaries. We can see these two lovely trees from our flat and they both look in very healthy condition. I could not find any report attached to the application supporting the "rot" statement.</p> <p>Rebuilding of the affected walls in a suitable way should prevent any need for the removal of the trees. Moreover, no detail of "unhappy neighbours" has been provided in the application and I don't see any neighbours having made a note of support for the tree removal via the planning portal. There will be a great deal of "unhappy neighbours" if these two trees are removed!</p> <p>If applications to fell trees were approved every time there was some damage to a wall or pavement or complaints about "shade" (which is completely subjective to current leaseholders/owners - felling of trees is permanent) then we wouldn't have many trees left in Belsize Conservation Area.</p>

2021/3349/T	Pearce	19/07/2021 12:56:11	OBJ	<p>The two existing Plane trees have always been maintained well by the previous owners, they are of medium size and appear healthy, there is no evidence given to prove otherwise or a surveyors report provided to suggest any issue with the garden walls.</p> <p>The gardens face east so there is some shading for a few morning hours , however the gardens have wonderful full midday and evening sunshine.</p> <p>We are not aware of the trees being a problem to any of our neighbours ,if the regular care is continued - this is clear in the comments already received.</p> <p>There is however some speculation that this is a prelude to a possible extending/basement at the property, which would then affect the neighbours</p> <p>As with a few similar local applications recently, it is encouraging to see that Camden council are retaining and protecting our valuable trees with a TPO</p>

Application No:	Consultees Name:	Received:	Comment:	Response:
2021/3349/T	B A Abraham for The Belsize Society	17/07/2021 12:15:08	OBJ	<p>For the Belsize Society: These two plane trees form part of a narrow strip of trees - a green barrier - between Buckland Crescent and Adamson Road. The neighbourhood is not far from the junction of College Crescent/Avenue Road and Finchley Road, with its 7 lanes of busy traffic, and this green barrier offers some protection to local residents against the noise and air pollution of the traffic, as well as providing a habitat for wildlife. The removal of two trees from this narrow strip of trees would severely deplete the ecological and environmental benefits.</p> <p>It is said that the trees have destroyed a brick boundary wall but this is not a good reason to fell the trees. If the wall needs to be rebuilt, it should be reconstructed in a manner which accommodates the continuing presence of the trees. (There are numerous examples within the Belsize Conservation Area of adjustments made to walls and of the reconstruction of sections of walls to accommodate the growth of nearby trees.) The trees offer multiple benefits for the neighbourhood and should take priority over the wall.</p> <p>It is said that one of the trees has severe decay to heartwood, but no evidence has been submitted to support this.</p>
