2021/2954/P	Dr Brian Curnew	27/07/2021 15:08:04	COMMNT	<p>The proposed development is unsuitable because of</p> <p>1 - increased height in comparison with the existing building, affecting views from street level and above, and inconsistent with its context</p> <p>2 - any adaptation of the existing building or re-use of the site should be an architectural enhancement to its context, not a nondescript and too visible block.</p> <p>3 - the plans show a poor mix of increased office space of questionable future use and residential , especially affordable, and amenity provision; and in current Covid and prospective post-Covid circumstances they should not be approved.</p> <p>I am not not a resident of Camden, but a Londoner with a great care for the built environment around Bloomsbury and Covent Garden.</p> <p>I strongly support the endeavour of more local campaigners to Save Museum Street.</p>
