Dear Sir / Madam,

FRANCIS CRICK INSTITUTE, 1 MIDLAND ROAD, LONDON, NW1 1AT
APPLICATION FOR ADVERTISEMENT CONSENT ALONG DANGOOR WALK NW1 COMPRISING THE
DISPLAY OF SECTIONS OF PAINTED ROAD SURFACE ALL FOR A TEMPORARY TIME PERIOD

On behalf of our client, Francis Crick Institute Ltd, we submit an application for temporary advertisement consent in relation to Francis Crick Institute, 1 Midland Road, London NW1 1AT. The submission all relates to the display of advertisement along Dangoor Walk and comprises;

"Display of 12 x sections of painted road surface"

Site Context

The Francis Crick Institute is a biomedical research centre in Camden. It is bound by Ossulston Street to the west, Brill Place to the north, Midland Road to the east and the British Library/Dangoor Walk to the south.

The site benefits from excellent public transport links and has a Public Transport Accessibility Level of 6b. St. Pancras International is approximately 50m to the east, King's Cross Station approximately 200m beyond and Euston Station is approximately 300m away to the west along Euston Road.

Planning History

There are no recent or relevant planning records for the site or surrounding area to this application according to the Council's planning search function although the Council should be aware that the Crick has another extant advertisement consent (Planning Portal Reference. PP-09844757) in respect to the display of vinyl panels to the front of the building, to Midland Road.

Details of Proposed Signage

The proposed advertisement consists of sections of painted road surface along Dangoor Walk.

All of the displays will be contributing to an outdoor exhibition consistent with the Crick's S.106 obligations in terms of Community Engagement which has occurred since the end of Covid-19 measures.

It is proposed that along Dangoor Walk a series of small shapes, approx. 50, in a scattered pattern will be painted on the surface with the addition of two rectangular painted areas at the start and end of the walk. The proposed shapes will cover 88.5m of the 173.217m path. The paint will be non-slip MultiGrip. The larger rectangular painted areas will measure approx. between 1.5m and 2.6m in height and 2.3m and 4.95m in width. The paint type has been selected as it is designed specifically for this purpose and it can

Our Ref: PW/AM/FCI

be removed, at the end of the exhibition, without causing damage to the underlying surface. It is perhaps relevant to highlight that Dangoor Walk is a private walkway in the ownership of the Crick and is not adopted highway.

This advertisement consent application is submitted in parallel with another advertisement consent application by the Francis Crick Institute for advertisement along Dangoor Walk which comprises 12 x fence panels and 2 x window vinyl displays to the side elevation. The painted road sections are an integral part of the overall exhibition design.

Dimensions, details and visuals of the proposed temporary advertisement can be found in the Planning Document prepared by Hato on behalf of the Francis Crick Institute which has been submitted with this advertisement consent application.

Local Development Plan

In accordance with Section 70(2) of the Town and Country Planning Act 1990 and Section 38(6) of the Planning and Compulsory Purchase Act 2004, planning applications should be determined in accordance with the Development Plan unless material considerations indicate otherwise. The Development Plan comprises:

- The London Plan (2021); and
- Camden Local Plan (2017)

The Camden Planning Guidance (CPG) on Adverts is also a material consideration.

Planning Considerations

Local Plan Policy D4 (Advertisements) of the Camden Local Plan requires advertisements to preserve or enhance the character of their host building and respective setting through respecting the form, fabric, design and scale. The policy sets out that the Council will support advertisement which preserves the character and amenity of an area and preserve or enhance heritage assets and conservation areas. Furthermore, the policy states the Council will resist advertisements which contribute to an unsightly proliferation of signage in the area, contribute to street clutter in the public realm, cause light pollution to nearby residential properties or wildlife habitats, have flashing illuminated elements or impact upon public safety.

The CPG on Adverts state that in general, the most satisfactory advertisements are those which take into account the character and design of the property, the appearance of its surroundings and the external fabric of the host building.

No illumination is proposed and the proposals will not provide a street clutter appearance on Dangoor Walk. The signage has been strategically positioned to not hinder pedestrian movement.

The Francis Crick Institute is considered to be both a landmark and unique building under the terms of the CPG within the Borough and the signage will assist in promoting the multiple public benefits that the institute offers which visitors and other members of the public may not be aware of.

The purpose of the installation is to raise publicity and awareness to the public of the Crick's free outdoor exhibition 'Pathway to Discovery'. The proposed painted sections would only be displayed for two years, being installed on 25 October 2021 and removed on 25 October 2023 to correspond with the dates of the exhibition. As such they are designed to be installed and removed without damaging Dangoor Walk.

Our Ref: PW/AM/FCI

One of the Crick's strategic priorities is to engage and inspire the public. Public exhibitions help the Crick to fulfil its community and public engagement commitments which are set out in the Community Engagement Plan, under clause 4.10 of the S106. The restrictions placed on the Crick over the past year has resulted in physical exhibitions having to be suspended but with the relaxation of restrictions from nominally the 19th July 2021, the Crick is seeking a progressive return to providing physical community engagement activities in accordance with the Community Engagement Plan.

It is considered that the installation of the painted road sections would be compliant with design policies set out by the Council and would assist the Crick to fulfil its wider commitments.

Scope of the Planning Application

The documents submitted with the planning application include the following:

- Completed Application Form;
- This Planning Covering Letter;
- Planning Document prepared by Yellowfinch Marketing; and separately,
- Site Location Plan
- Site Block Plan
- The Planning Application fee of **£462** (+ £28 service charge) has been paid via the Planning Portal.

Conclusion

The proposed signage would provide benefits to the host building by offering an outdoor exhibition, free and open to all, to inform and inspire the general public about its work. The displays are considered an important component in bringing together the wider vision for the Crick and its status within the local community and further afield. The proposals will contribute to creating an attractive temporary exhibition to Dangoor Walk, whilst respecting the nearby conservation areas.

We trust that you have all the information you require to register this application. If, in the interim, you have any queries please do not hesitate to contact myself at this office. We look forward to your formal acknowledgment of the application.

Yours faithfully,
