2021/3668/T	A Kaye	31/07/2021 16:40:28	COMMNT	<p>Felling so many trees is a worry. Given the recent heavy downpours and flooding it would seem better to keep these trees as they help drainage and stabilise the soil.</p> <p>These trees are part of the green corridor and they are not too large, thus allowing light to come through yet protect privacy between the houses.</p>
2021/3668/T	Martha and Michael James	01/08/2021 15:37:15	COMMNT	<p>We protest most strongly against this application. The trees in question are in a Biodiversity Corridor that is part of the Hampstead Plan. A eucalyptus has recently been felled by either No 15 or 16 Downshire Hill as being 'non-native'. The same cannot be said for a birch or cherry tree - and the mixed species group might include anything. The Engineers report for the application gives no good reason to destroy the trees and could apply to almost all the vegetation in the neighbourhood.</p> <p>We too have a birch tree at 42 Pilgrims Lane. It has a TPO and is maintained annually for insurance purposes and we see no justification for felling a similar tree in Downshire Hill.</p>
