2021/3464/L	Councillor Julian Fulbrook	04/08/2021 09:44:22	COMM	<p>This was always a very curious endeavour. I suspected that going underground into a former public toilet was not always going to be a paying proposition, particularly in daylight hours... The addition of dining arrangements on the roof would obviously assist in making this establishment pay. With the benefit of hindsight it would have been better to have applied for planning permission in advance of structural changes and the chairs placed on the roof, so this is essentially a retrospective application. But on the whole I have come to the view that bringing the listed building back into use, and the respectful approach adopted to the immediate neighbourhood in the documentation, commends this further application. As there is a residential neighbourhood and residents close by I would hope that licensing arrangements and appropriate standards will apply to stop this being any kind of public nuisance? So aside from that condition I would support the application.</p>
