Details of the pre-application advice received

The following are extracts from the advice report, relevant to what is included in the current application:

The installation of solar panels is something that the Council could look to support; however further information relating to the impact on public and private views and details of the projection distance above the roof must also be provided.

The installation of a rear staircase from lower ground floor garden level to upper ground floor level appears acceptable, providing it comprises sympathetic materials and design.

In terms of the drainpipe, the alteration is considered acceptable and does impact on the character of the property.

Changing the painted colour of the existing front door, while restoring the existing door, would be acceptable (confirmed through follow up clarification following the advice report).

In terms of the proposed replacement of the windows to the front and side elevations, no objection is raised to the principle of replacing these windows and frames. However, the replacement must include original materials such as timber frames to ensure that the character of the building is maintained. uPVC would not be supported.

The proposed circular window within the gable roof on the front elevation, if modest in size, is sympathetic and is considered acceptable.

The enlarged windows to the side and rear elevation are considered acceptable, providing the materials used are sympathetic to the host property and conservation area.
