Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

Tree Tag No.	Tree Species	Est DBH	Tag Present	Condition	Comment	Recommended action	THREATS category	Priority	Work code
1	ILAQ	15	Y	F		No action			
1A	MONI	40	N	F/P	Main fork splitting apart; props helping to support crown. Light pruning carried out 2015.	No action	2 (minimal)		
2	QURO	80	Y	F	Veteran with past and more recent storm damage. Minor-moderate sized deadwood over the track.	No action	2 (minimal)		
3	QURO	65	Y	F		No action			
4	QURO	65	Y	F		No action			
5	FASY	80	Y	F	Minor defect on sub- stem overhanging neighbouring building, reduced by 2-3m in 2015.	Sever and remove ivy up to 2m clear stem.	2 (minimal)	1 year	OS/L/2.24
6	TABA	15	Y	F		No action			
7	GONE								
8	PHLA	15	Y			No action			
9	JURE	45	Y	F	Maturing walnut, crown lifted over hedge in 2015/6.	No action			
10	ACPS	49	Y	F	Small habitat hole (5x5cm) on north side of main trunk at around 2m, some adaptive growth/swelling in this region but no obvious hollow sound and tree is otherwise outwardly healthy with normal vigour for age/species.	No action	2 (minimal)		
11	GONE								
12	ACPS	43	Y	F		No action			

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

13	QURO	95	Y	F	Veteran. Soil decompaction by Terravent carried out in March 2009. Mycorrhizal inoculation also applied. Deadwood removed/reduced in 2017.	No action	2 (minimal)		
14	CASA	107	Y	F	Veteran. Soil decompaction by Terravent carried out in March 2009. Mycorrhizal inoculation also applied. Minor shoot death noted at top of crown.	No action	2 (minimal)		
15	QURO	5	Y	G	x 3 Semi Mature Oaks. Soil decompaction by Terravent carried out in March 2009. Mycorrhizal inoculation also applied.	Formative prune all the semi-mature oaks along this section to ensure 1m clearance over and from the fence and adequate height clearances to allow for the view. Suggest crown lifting to 2m clear stems (but as agreed by Head Gardener).	Mgnt	6 months	OS/M/2.2
16	QURO	107	Yes	Poor	Veteran hulk (6m high) next to park bench. Small crown. <u>Extensive</u> internal decay visible within large old open trunk wound. Soil decompaction by Terravent carried out in March 2009. Mycorrhizal inoculation also applied. Lightly crown reduced in 2011. Reduced down to 4/5m monolith in 2019.	No action	3 (slight)		

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

17	QURO	112	Yes	Fair	Veteran, lapsed pollard long ago with large broad spreading crown above. Light crown reduction in 2015/6. Lower/inner crown now forming. Further phased pre-emptive retrenchment prudent within the next 5 years.	No action	3 (slight)		
18	ACSA	60	Yes	Fair	Large mature silver maple. Patches of bark death and exposed sapwood around trunk base, typical of honey fungus. Heavy and inclining crown bias south over tarmac footpath.	Carry out detailed wood decay testing (acoustic tomography) and root collar assessment.	TBC	3 months	n/a
19	CABE	40	Y	F		No action			
20	QURO	4	Y	F		No action			
21	QURO	127	Y	F	Veteran in well sheltered location. Crown reduced in 2014/15	No action	2 (minimal)		
22	QURO	26	Y	F		No action			
23	QURO	35	Yes	Fair	DW removed in 2019.	No action	2 (minimal)		
24	QURO	25	Yes	Fair	DW removed in 2019.	No action	2 (minimal)		
25	GONE								
26	BETP	38	Yes	Fair		No action			
27	FASY	45	Yes	Fair	Squirrel damaged heavy lateral branches over the main drive reduced in 2019/20.	No action	2 (minimal)		
28	FASY	75	Yes	Fair	Squirrel damaged heavy lateral branches over the main drive reduced in 2019/20.	No action	2 (minimal)		
29	ACPS	37	Y	F		No action			

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

30	ACPS	30 x4	Yes	Fair	Bark wounding at main forks with included bark unions. Four stems above - reduced in height by c4-5m in 2019/20.	No action	2 (minimal)		
31	CABE	35	Y	F		No action			
32	PRSP	40	Y	F	Wood decay fungi (<i>Phellinus pomaceus</i>) on trunk base. Good trunk taper, sound buttresses and no obvious basal wounding or significant hollowing. Deadwood removed in 2015/6.	No action	2 (minimal)		
33	PRSP	27	Y	F		No action			
34	QURO	35	Yes	Fair	Light lateral branch reduction over drive and back from building in 2019/20.	No action	2 (minimal)		
35	PRSP	28	Y	F		No action			
36	PRSP	30	Y	F		No action			
37	PRSP	27	Yes	Fair		No action			
38	PRSP	17	Y	F		No action			
39	PRSP	13	Y	F		No action			
40	QURO	17	Y	F		No action			
40a	MEGL	25	N	Fair	Located between tree numbers 40 and 3306.	Sever and remove ivy up to 2m clear trunk.	2 (minimal)	1 year	OS/S/2.24
41	CABE	39	Y	F		No action			
42	PISY	15		D	5m dead pole	No action			
43	COAV	4	Y	F		No action			
44	PRSP	6	Y	F		No action			
45	PRSP	8	Y	F		No action			
46	PISY	67	Y	D	Root decay fungi present (<i>Phaeolus schweinitzii</i>) and hollowing at base. Reduced to 4m stump in 2008.	No action	2 (minimal)		

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

47	PISY	33	Y	F		No action			
48	FASY	42	Y	F	Outbreak of felted beech Cryptococcus fagisuga on lower branches. Not a structural safety issue.	No action	2 (minimal)		
49	GONE								
50	PRSP	10	Y	F		No action			
51	ACPS	79	Yes	Fair	Mature sycamore with past storm damage at a main fork near the top. Reduced in 2018/9 and deadwood at top removed in 2018/9.	No action	2 (minimal)		
52	AEHI	91	Y	F		No action			
53	ACPS	76	Yes	Fair	Lowest lateral branch west side suffered significant mechanical damage and has been removed. This has left the lower crown asymmetrical, however the tree appears to be in a relatively sound and healthy condition with an outwardly sound lower main stem and buttress roots. Therefore the removal of the damaged limb is unlikely to have had any adverse effect on the structural integrity and stability of the tree and further remedial works at this time would cause undue stress.	No action	2 (minimal)		
54	GONE								
55	PRSP	25	Y	F		No action			
56	GONE

153	AEHI	96		GONE					

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

154	FASY	115	Y	FAIR / POOR	Upper parts of crown have died back significantly (15%) since the building work on the flats and resurfacing of the drive (2018), i.e. root damage and disturbance as a result of the work. No signs of fungal fruiting bodies were present and the lower main stem and buttress roots are outwardly sound. Structural condition does not appear to have been compromised yet at this time. However this is a fine tree in the context of the site and is close to the residential apartments and the busy road.	Remedial work as follows: - 1. Reduce the height from c19m down to c16m, leaving final pruning cuts of between 80-100mm diameter (i.e. by 15% to remove the bulk of the dieback) and then lightly tip-reduce the remaining upper crown by c1-1.5m (50-75mm diameter final pruning cuts) to balance the overall crown shape. This is aimed at attempting to re-balance the root/shoot ratio. 2. Lightly aerate the surrounding root zone by inserting a garden fork to full tine-depth and brushing in a mixture of horticultural grade sand with specialist tree fertiliser such as Carbon Gold. Irrigate during prolonged drought and heat waves, as necessary.	2 (minimal)	Jan/Feb 2021	RS/XL/2.10

1139	CRMO	15	Y	D		No action			
1139a	ACPS	27	N	F	There is a group of trees up near the back gate off Hampstead Lane up from tree no. 1140. Some of them have branches growing into the neighbouring residential building (wall/roof/gutter).	Prune to ensure 1.5m clearance from the surrounding built structures.	2 (minimal)	6 months	OS/M/2.2
1140	FASY	160	Y	F	Massive and significant tree of major landscape value. Residential buildings to the west present high value target area. Basal cavities and hollowing evident to the eye, surrounded by well formed adaptive trunk flare, stem taper and seemingly sound buttresses. Decay test (picus) carried out in July 2013, appears to suggest that there is hollowing from ground level up to around 80cm height, but that the residual shell wall is >1/3 radius. No fungal fruiting bodies ever noted (since 2008). Tree height and upper crown reduced by around 15% for precautionary risk management reasons in 2015 - responding well.	No action	3 (slight)		
1141	GONE								
1142	ILAQ	20	Y	F		No action

Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

1939	FASY	30	Y	POOR	Deadwood removed in 2015/6. Dieback showing 20% defoliation at top of crown in early summer 2019, now almost 90% defoliated (July 2020). Tree trifurcates at 2.5m, stem to east dead (4-5m). Compaction and drought combined most likely cause. Unsure if completely expired and beyond any sort of recovery. Not a significant hazard so may be worth reviewing at bud break spring 2021.	Re-inspect spring 2021 (bud burst) for signs of live cambial tissue in twigs, branches and stem.	2 (minimal)	6 months	n/a
1940	QURO	27	Y	F	Twin-stemmed with included fork bark, stem upright and well sheltered.	No action	2 (minimal)		
1941	QUIL	60	Yes	Fair	Maturing holm oak, providing useful evergreen foil to this shelterbelt. Basal wounds north & east sides, extend <40cm into cross sectional root collar at base. Wood appears case hardened and dysfunctional but not actively decayed via a pathogen or known decay fungi. Resistograph measurements (April 2018) suggest residual shell wall and buttress roots are very solid. Tree appears to be within reasonably safe limits.	No action	2 (minimal)		
1942	GONE

Inspection dates: 11-20 Aug 2020

2010	TISP	35	Y	F/P	Superficial stem wounds at base and at 0.5m, bark death and sapwood exposed with woundwood present. Manual sound test indicates no obvious hollowing. Basal growth now maturing. Poor stock with inherently tight forking.	No action	2 (minimal)		
2011	TISP	50	Y	F/P	Poor stock with inherently tight forking.	No action			
2012	QURO	170	Yes	Fair / poor	Large and notable veteran hedgerow oak exhibiting fair vitality for age/species. Long history of storm damage - large old tear out wounds (esp. SW side of main trunk), huge lateral branch failed on east side in 2007/8 also resulting in large tear-out wound. Heavy lateral branch over path reduced in 2009. Whole crown fairly lightly reduced in 2015/6 (assisted retrenchment and risk management). Tomograph and resistance drillings (spring 2018) appear to confirm extensive basal decay that radiates out from a central hollow to the north west and south east quadrants. Buttressing is predominantly sound and the extent of decay at 100cm above ground level is considerably less. Further light crown reduction (0.5 - 1m) all over carried out in summer 2018 and dead hedge created to control visitor movement within dripine of crown. Responding well.	No action	3 (slight)

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

2815	ACPS	40	Y	F	Basal fork is tight with a bark included union. The two stems are upright, the crown is well-balanced and sheltered from prevailing winds by the surrounding trees to the south and west. Tree's value suggests cable bracing is not good use of resources but some risk management is considered prudent due to the target..	Reduce the overall height by around 15% (i.e. 2.5m), back to suitable growth points and round off the remaining lateral spread in the upper canopy to visually balance.	3 (slight)	1 year	OS/M/2.10
2816	ACPS	45	Y	F					
2817	ACPS	40	N	F/P	Three main stems, one of which is hollow. Reduced to 11m in 2008. Expect to schedule repeat pruning within 3 years.	Sever and remove ivy from ground level up to 2m.	3 (slight)	1 year	OS/M/2.24

Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

53	ACPS	76	Yes	Fair	Lowest lateral branch west side suffered significant mechanical damage and has been removed. This has left the lower crown asymmetrical, however the tree appears to be in a relatively sound and healthy condition with an outwardly sound lower main stem and buttress roots. Therefore the removal of the damaged limb is unlikely to have had any adverse effect on the structural integrity and stability of the tree and further remedial works at this time would cause undue stress.	No action	2 (minimal)

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

154	FASY	115	Y	FAIR / POOR	Upper parts of crown have died back significantly (15%) since the building work on the flats and resurfacing of the drive (2018), i.e. root damage and disturbance as a result of the work. No signs of fungal fruiting bodies were present and the lower main stem and buttress roots are outwardly sound. Structural condition does not appear to have been compromised yet at this time. However this is a fine tree in the context of the site and is close to the residential apartments and the busy road.	Remedial work as follows: - 1. Reduce the height from c19m down to c16m, leaving final pruning cuts of between 80-100mm diameter (i.e. by 15% to remove the bulk of the dieback) and then lightly tip-reduce the remaining upper crown by c1-1.5m (50-75mm diameter final pruning cuts) to balance the overall crown shape. This is aimed at attempting to re-balance the root/shoot ratio. 2. Lightly aerate the surrounding root zone by inserting a garden fork to full tine-depth and brushing in a mixture of horticultural grade sand with specialist tree fertiliser such as Carbon Gold. Irrigate during prolonged drought and heat waves, as necessary.	2 (minimal)	Jan/Feb 2021	RS/XL/2.10	Y

1138	CRMO	20	Y	D		No action				
1139	CRMO	15	Y	D		No action				
1139a	ACPS	27	N	F	There is a group of trees up near the back gate off Hampstead Lane up from tree no. 1140. Some of them have branches growing into the neighbouring residential building (wall/roof/gutter).	Prune to ensure 1.5m clearance from the surrounding built structures.	2 (minimal)	6 months	OS/M/2.2	Y
1140	FASY	160	Y	F	Massive and significant tree of major landscape value. Residential buildings to the west present high value target area. Basal cavities and hollowing evident to the eye, surrounded by well formed adaptive trunk flare, stem taper and seemingly sound buttresses. Decay test (picus) carried out in July 2013, appears to suggest that there is hollowing from ground level up to around 80cm height, but that the residual shell wall is >1/3 radius. No fungal fruiting bodies ever noted (since 2008). Tree height and upper crown reduced by around 15% for precautionary risk management reasons in 2015 - responding well.	No action	3 (slight)			
1141	GONE

2009	TISP	44	Y	F/P	Poor stock with inherently tight forking.	No action				

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

2010	TISP	35	Y	F/P	Superficial stem wounds at base and at 0.5m, bark death and sapwood exposed with woundwood present. Manual sound test indicates no obvious hollowing. Basal growth now maturing. Poor stock with inherently tight forking.	No action	2 (minimal)			
2011	TISP	50	Y	F/P	Poor stock with inherently tight forking.	No action				
2012	QURO	170	Yes	Fair / poor	Large and notable veteran hedgerow oak exhibiting fair vitality for age/species. Long history of storm damage - large old tear out wounds (esp. SW side of main trunk), huge lateral branch failed on east side in 2007/8 also resulting in large tear-out wound. Heavy lateral branch over path reduced in 2009. Whole crown fairly lightly reduced in 2015/6 (assisted retrenchment and risk management). Tomograph and resistance drillings (spring 2018) appear to confirm extensive basal decay that radiates out from a central hollow to the north west and south east quadrants. Buttressing is predominantly sound and the extent of decay at 100cm above ground level is considerably less. Further light crown reduction (0.5 - 1m) all over carried out in summer 2018 and dead hedge created to control visitor movement within dripine of crown. Responding well.	No action	3 (slight)

2451	QURO	98	Y	F	Veteran oak by Dairy cottage. Pre-emptive crown retrenchment during renovation project in 2015/6. Responding really well.	No action	2 (minimal)			
2452	PLHI	90	Y	F	Large mature tree within car park. Symptoms of Massaria disease and deadwood.	Remove all deadwood over 75mm diameter and/or 1.5m long.	3 (slight)	6 months	OS/L/2.5	Y
2453	PLHI	103	Y	F	Large mature tree within car park. Symptoms of Massaria disease and deadwood.	Remove all deadwood over 75mm diameter and/or 1.5m long.	3 (slight)	6 months	OS/L/2.5	Y

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

2454	QURO	158	Y	F	Overhanging car park. Large veteran oak overhanging visitor's car park and busy footpaths. Basal openings south and south west side, leading to contained hollow. Manual sound test appears to indicate no major decay and there are well formed and sound buttresses all around the trunk flare. Large vertical wound north west on stem at 4.5m (est 200x20cm) exhibiting exposed case-hardened wood surrounded by good woundwood formation. Main fork at 7m is tensile. Crown reduced by 3-4m 2014-15 (risk management).	No action	3 (slight)			
2455	FASY	17	Y	P	Suppressed	No action				
2456	ILAQ	15	Y	F		No action				
2457	QURO	35	Y	F		No action				
2458	QURO	127	Y	F	Huge veteran oak close to footpath. Main fork at 7m tensile in nature with 2 main upright stems above. Dead wood removed over footpath 2014-15.	No action	2 (minimal)			
2459	QURO	95	N	F/P	Veteran oak next to old beech monolith on edge of visitor's car park. Numerous habitat holes in stems and branches, one completely dead stem (reduced in recent past). Old tear-out wounds and storm damage throughout. Good re-growth from recent pruning (>4m long).	No action	2 (minimal)			
2460	GONE				Low branches and vegetation encroaching into car parking spaces along this stretch.	Cut back small branches and vegetation to ensure clear access and height clearances for parking.	Mgnt	6 months	OS/S/2.2	Y

2807	FASY	62	Gone	F		No action				
2808	ROPS	40	N	F/P	Tight, compressive and included unions throughout crown. Typical of species.	No action	2 (minimal)			
2809	GONE									
2810	GONE									
2811	GONE									
2812	GONE									
2813	ACPS	69	Y	F		Sever and remove ivy up to 2m.	2 (minimal)	1 year	OS/L/2.24	Y
2814	ACPS	47	N	F		No action				
2815	ACPS	40	Y	F	Basal fork is tight with a bark included union. The two stems are upright, the crown is well-balanced and sheltered from prevailing winds by the surrounding trees to the south and west. Tree's value suggests cable bracing is not good use of resources but some risk management is considered prudent due to the target..	Reduce the overall height by around 15% (i.e. 2.5m), back to suitable growth points and round off the remaining lateral spread in the upper canopy to visually balance.	3 (slight)	1 year	OS/M/2.10	Y
2816	ACPS	45	Y	F						

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

2817	ACPS	40	N	F/P	Three main stems, one of which is hollow. Reduced to 11m in 2008. Expect to schedule repeat pruning within 3 years.	Sever and remove ivy from ground level up to 2m.	3 (slight)	1 year	OS/M/2.24	Y
2818	TABA	12	Y	F		No action

3361	QUCE	28		GONE						
3362	SAAL	75	Y	F	Mature maiden white willow. Small wound/opening at 1.5m on the north side of trunk, leading into localised hollow, where manual sound test appears to give minor variations in tone. Steel probe passes into pocket up to 400mm (i.e. approx' 50% of diameter). Resisitograph measurements (April 2018) suggest the outer 30cm (75%) of the residual shell wall (south and west) contain no hollowing or advanced decay. Otherwise overall vigour appears normal for age/species for a mature willow and no obvious signs of disease or fungal colonisation. Tree therefore appears to be within reasonably safe limits.	No action.	3 (slight)

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

3506	BETP	9	Y	F		No action				
3507	SOIN	44+	Y	F	Notable tree.	No action				
3508	FASY	68	Yes	Fair / poor	Large mature beech on bank by lake. South east side between buttresses is a small opening with patch of <i>Kretzschmaria deusta</i> fruiting bodies (first noted around 2010). Tree inclines slightly to north west (into fenced-off area) with large oak to east.	No action	3 (slight)			
3509	QURO	77	Yes	Fair	Large late mature oak beside T3508. No major defects noted at present, but crown showing signs of decline.	No action	2 (minimal)			
3510	FASY	65	Yes	Fair	Significant decline (25% defoliated). Inclines towards lake.	Cut back holly to 25cm radial clearance around trunk base to enable access for more detailed inspection of trunk base.	Mgnt	6 months	RS/S/2.21	Y
3511	QUCE	114	Yes	Fair	Notable tree with large lateral spread over popular picnic area. Selective lateral reduction carried out in 2012.	No action	2 (minimal)			
3512	COCO	19	Y	F		No action				
3513	COCO	21	Y	F		No action				
3514	GONE									
3515	FASY	51	Y	F		No action				
3516	QURO	51	Y	F		No action				
3517	CRMO	14	Y	F		No action				
3518	CRMO	26	Y	F/P	Dieback.	No action				
3519	CRMO	32	Y	F		No action				
3520	GONE									
3521	GONE									

English Heritage - Kenwood House

Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

3548	AEHI	89	Y	F/P	History of minor storm damage and selective pruning. Advanced bleeding canker. Some selective reduction in 2008. Expect to schedule further work within 3 years.	No action	3 (slight)			
3549	CRMO	31	Y	G		No action				
3550	GONE									
3551	GONE									
3552	GONE									
3553	GONE									
3554	GONE									
3555	TIEU	55	Y	F	Three stems from re-growth.	No action				
3556	GONE									
3557	TIEU	38	Y	F		No action				
3558	TIEU	41	Y	F		No action				
3559	TIEU	40	Y	F		No action				
3560	GONE									
3561	GONE									
3562	AEHI	115	Y	F/P	Large & multi-stemmed from tight compressive basal forks. Targeted crown reduction work in 2015/6.	No action	2 (minimal)			
3563	ILAQ	21	Y	F		No action				
3564	CABE	33	Y	F		No action				
3565	ACPS	60	Y	F		No action				
3566	ILAQ	24	Y	F		No action				
3567	FREX	7	Y	F	Main fork at 2m, tight with included bark union. 2 upright stems above, well-sheltered by woodland on higher ground to the south and west.	No action	2 (minimal)			
3568	FREX	92	Y	F	Reduced to 8m long ago, smaller crown now established.	No action	3 (slight)			
3569	ILAQ	21	Y	F		No action				
3570	AEHI	59	Y	F	Snapped off at 3m and fallen into SSSI area. Minimal damage to fence. Now retained as habitat stump.	No action				

English Heritage - Kenwood House
Scheduled tree inspection

Monument no.361
Inspector ID:JFD
Inspection dates: 11-20 Aug 2020

3571	GONE									
3572	TABA	18	Y	F		No action				
3573	QURO	21	Y	F		No action				
3574	QURO	24	Y	F	Extensive Holly at base limiting inspection. Close grown with T3573. Crown overhangs metal fencing and in to open area.	No action	2 (minimal)			
3575	QURO	38	Y	F		No action				
3576	ILAQ	18	Y	F		No action				
3577	AEHI	97	Y	F	Bleeding canker. Overhangs old concert seating area.	No action	2 (minimal)			
3578	ILAQ	22	N	F		No action				
3579	GONE									
3580	AEHI	110	Y	P	Stems growing out over footpath reduced to main fork due to past storm damage.	No action	2 (minimal)			
3581	AEHI	34	Y	F		No action				
3582	ILAQ	17	Y	F		No action				
3583	BETP	15	Y	F	In amongst the yews behind "sham" bridge.	No action				
3584	QURO	54	Y	F		No action				
3585	TIEU	15	Y	F	Close to proposed working area for "sham" bridge restoration project.	No action				
3586	TIEU	13	Y	F		No action				
3587	TIEU	31	Y	F		No action				
3588	CRMO	17	Y	F		No action				
3589	TIEU	75	Y	F	Re-pollarded in 2008. Severe internal decay and hollowing.	No action	2 (minimal)			
3590	GONE									
3591	GONE									
3592	GONE
