**Subject:** COMMENTS ON APPLICATION 2021/3812/T SITE : 29 BRIARDALE GARDENS NW3 7PN

Dear team,

Application : 2021/3812/T

I wish to comments on the above planning application as an objection to the tree works intended by our neighbour. The applicant wants to prune these lovely trees which overhang our garden. We are very concerned by this proposal given the long term damage which will be caused by the over pruning of these tress so the applicant can carry out extensive building works in the gardens. This is the third application as there were previous applications to removed 3m from the tree and now a further 3m which is unacceptable. We would like to get advice on this as the damage to these trees which have a significant benefit to the environment in the area will be devastating.

Kind Regards
