2021/3821/L	Camden Town Conservation Area Advisory Committee	19/08/2021 09:56:16	OBJ	<p>The Committee objects to the proposed colour of the lift enclosure which will stand out against the principal facade and adjoining metalwork and therefore is not sympathetic to the Listed Building. Matching existing adjoining balustrading would be acceptable as that appears to be a more appropriate recessive colour (dark grey or black) as this will minimise its visual presence - this is particularly important in view of the fact that the proposed enclosure is larger than the current installation. If this aspect is amended the Committee would not object to the proposal.</p> <p>As the windows are on the rear elevation and not visible from the street, and in view of the requirements for safe ventilation, we do not object to the proposed replacements although would have preferred to see a timber casement rather than aluminium framed in view of the building's Listed status.</p>
