2021/3668/T	E. West	20/08/2021 14:10:19	OBJ	As part of the biodiversity corridor recognised and supported by the Hampstead Neighbourhood Plan (which so many residents are grateful for) these mature trees make an essential contribution to the quality of air and wildlife habitat. This proposal does not sufficiently show that subsidence cannot be addressed by remedial work rather than felling. A similarly beautiful mature birch tree grows close to our property which is subject to a Tree Preservation Order.
