

I could not access the form through my Mac , so I,m writing this e mail

To whom it may concern ,

I live at no 4 Maryon Mews and was quite amazed at this application being considered .

Some of this area is designated a conservation area I believe (although this does not include 22 ,23) and this proposed building would radically transform the environment

22 and 23 are already the tallest buildings in the vicinity and if a storey was added ,this would create a completely disproportionate and overbearing structure that would inhibit our light and tower over our little mews .

I feel it's totally unacceptable and am astonished that it has been proposed by a resident of our area .

Yours

John Etheridge
