Description						
Please describe details of the pr	oposed develop	oment or works including any change of use.				
Make an external change to the building in the form of railings to ground floor on the west side. They will be designed with exact reference to those currently sited on the north side of the building, using quality cast iron materials handcrafted by a conservation crafts-person. There railings will ensure better security to occupants and will improve the appearance of the front elevation of his property. The work will happen within the red-line envelope of the property. This will include the removal of the planters and the insertion of fine metal post/ bars in a way that does not detract from the historic significance of the building. This ensures that the core building retains its character and the property can be altered suitably to provide a more rounded aesthetic experience. The proposals have taken the dimension of the existing front railings to Grafton Way as its principle for the design, plan and layout of the space on Cleveland Street. The proposals will retain all elements of the existing building whilst casting iron railings on the line which currently defines the separation between private and public space. Currently three planters are located in the space between the wall and the line of the pavement, forming a default division. Basically, the works will accommodate much better landscaping within the demesne of the existing building. The new railings will be arranged and constructed in such a way that they can be removed at any time in the future by another tenant/ owner. No changes are planned to the outside such as to the windows, tiles or doors thereby causing no disruption to the significance of the building. The preferred option is to replicate that which is seen to the north of no 84 and indeed, to the east as predicated by the railings at no 65 – 71. These reference points give an indication as to the width and height of the stone plinth on which the new railing would be cast. The examples also provide an insight into the correct dimensions of the iron poles and the probable height at wh						
Has the work or change of use a	lready started?		☐ Yes	No		
7. Further information about the Proposed Development Are the proposals eligible for the 'Fast Track Route' based on the affordable housing threshold and other criteria? O Yes No Where proposals cover the whole existing building(s), please provide details (e.g. 'Rear Ground Floor', 'Unit 1 - 1st-3rd Floor')						
Ground Floor , Flat 1
